

Technical drawing 'a' shows a cross-section of a mechanical assembly. It features a central vertical shaft with a conical section. This shaft is surrounded by a complex housing or support structure. The housing has a thick, hatched outer shell. Inside this shell, there are several layers and components, including a central conical part and a surrounding ring-like structure. A small arrow points to a specific feature on the right side of the central shaft. The drawing is labeled with 'a' at the bottom left and 'b' at the bottom right.

A cross-sectional view of a mechanical assembly. The assembly consists of a central component (16) with a cross-hatched pattern, which is seated within a housing (2). The housing has a flange (4) at the top. A gasket or seal (9) is located between the central component and the housing. The central component has a large, irregularly shaped opening in the center.
